- Basic Understanding Of Java

## PROJECT'S

---

### JAYA SRI CREATIONS

Designed and developed a static website for Jaya Sri Creation, a textiles-based business. Focused on creating a user-friendly and visually appealing interface tailored to the brand. Ensured full responsiveness across devices for a seamless user experience. Enhanced site interactivity and presentation reflect the quality of textile products.

### RF ENGINEERING

Developed a responsive and user-friendly website for an RF Engineering concept titled "Innovating the Future of Electronics." Showcased advanced RF technologies, wireless systems, and high-frequency solutions with an interactive layout. Applied modern UI/UX practices for intuitive navigation and optimized performance. Delivered fast loading, cross-device compatible content tailored for both technical and general audiences.

### AIM WINDOW

Contributing to a live project for Aimwindow Info Tech, focusing on the employee and admin interface development. Currently working on building responsive layouts and integrating key functionalities; the project is in progress.

## INTERSHIP

---

Currently pursuing a Front-End Developer internship at Aim window Info Tech. Developed fully responsive and user-friendly static web pages. Contributed to live projects, focusing on UI enhancements and functionality. Actively working on improving existing components while continuously enhancing my skills.
